[Common Core](#) is dedicated to meeting the needs of teachers as they make the transition to using *Eureka Math*, our math curriculum found online at Common Core and at EngageNY. We are excited to announce that you can now purchase Student Editions of Eureka. These editions contain all of a single module's problem sets and homework, and are available as a bound book with perforated pages or as individual sheets. Both are three-hole punched. When you purchase Student Editions for your class, you may also buy companion packets that include sprints and assessments, individually collated for easy handling. Contact Common Core publishing partner Emprint/Moran Printing for more information or to submit your order.
